## FUND DESCRIPTION

The Indexed Mixed Bonds Fund is a passively managed fund, which invests in Eurozone securities and Euro Denominated Corporate Bonds. These securities are effectively loans to governments and large companies.

This fund should broadly follow the long-term changes in annuity prices due to interest rates, i.e. if long-term interest rates fall, the value of this fund will increase to roughly compensate for the rise in annuity prices. Long-term interest rates are just one of the main factors that determine the cost of an annuity. However, there will be times when the fund will not track annuity prices closely and no guarantee can be given in relation to such movements.

This is a medium risk fund which can have some level of volatility. The potential return from the fund will also be medium. It is suitable for investors who are close to retirement and want to buy a pension or have some appetite for risk.

When yields on government bonds decrease, the market value of the same bonds rise. Likewise, when yields on government bonds increase, the market value of the same bonds fall. The value of the bonds held within this Fund will act in same manner.

## BOND COUNTRY DISTRIBUTION

## BOND PORTFOLIO CREDIT QUALITY

The assets in this fund may be used for the purposes of securities lending in order to earn an additional return for the fund. While securities lending increases the level of risk within the fund it also provides an opportunity to increase the investment return.

This fund is provided by Irish Life Assurance plc and is managed by Irish Life Investment Managers Limited.
